

TECHNICAL SHEET

M 100 OIL

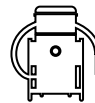

OIL & SWARF

The M 100 OIL model is designed to vacuum oil and swarf. Suction is generated by three by-pass motors that work in parallel and ensure an excellent vacuum speed. There is a basket inside the detachable container on wheels that is used to separate the solid part from the liquid part. A 150-micron filter can be fitted for a more powerful filtration. There is a practical external level indicator to show the amount of liquid vacuumed. Discharge takes place by gravity thanks to a 1" manual ball valve situated at the bottom of the container.

POWER

3,9 kW

CAPACITY

Lt 100

HIGHLIGHTS

SUCTION UNIT

The vacuum is generated by 3 by-pass motors. Each motor is managed by an independent switch, permitting the operator to control the intake performance. The motors are located in a sturdy casing, with an insulating sponge to maintain a low noise level.

FILTERING ELEMENT

The collected liquid goes through a PPL filter with a 150µ efficiency. Thanks to it it's possible to separate even the smallest solid particles, making the filtered liquid suitable for reuse. The filter can be washed and reused easily. An disposable TNT filter (efficiency 100µ) is also available.

TECHNICAL DATA

ENGINE		PRIMARY FILTER		MACHINE	
Suction type	by-pass	Media	nylon	Inlet	50 Ø mm
Voltage	230 V			Dimensions	700 x 450 mm
Maximum vacuum	250 mBar			Height	1400
Maximum air flow	570 m3/h			Weight	90 Kg
Noise level - (EN ISO 3744)	72 dB(A)			Liquid capacity	100
Engine	3			Solid capacity	50
Frequency	50/60 Hz			Oil filter	incluso
Power	5,2 HP			Filtration efficiency	150
Suction time	100/26			Discharge type	per gravità

OPTIONS

STRUCTURE AND OPTIONS

BX

Stainless steel bin AISI 304

ACCESSORY

P12352

Oil & swarf kit Ø 50mm.

Basic kit containing specific accessories for 50 mm diameter oil and swarf vacuuming application

P12355

Oil & Swarf Kit PRO Ø 50mm

Kit containing specific accessories for 50 mm diameter oil and swarf vacuuming application
